Business Capability Statement

06/01/2017

Company Profile

We are a small team of Australian based, highly skilled, professional software developers able to handle most project sizes for small to medium sized businesses.

We use virtual office technology to operate with low overheads. This allows us to provide very competitive pricing and handle dynamic workloads without having to price to cover the 'down times'.

We are proudly West Australian owned and have been operating for over 8 years. Our track record of completed projects, satisfied clients and successful after-project support is something we pride ourselves on.

Project Size

$500 up to $200,000 a year (Larger projects by negotiation)
